資源整合。解決問題。創造價值。 Resource Integration. Problem-solving. Value Creation.

稻米生長 Rice Production

水稻生產使用生物農藥、生物肥料的产品加值
Increase rice yield using bio-pesticides and bio-fertilizers.

動物屎糞回收再利用 Recycle Animal Waste

家禽、家畜屎糞回收再利用，
生物菌種生產高品質有機肥
poultry waste can be recycled with
suitable bio-bacteria to produce high
quality organic fertilizers.

廢物餵養 Converting waste to Feed

稻殼製成墊料飼料，科學化養殖家畜、家禽
Rice shell made be made into animal
feed for Chicken / Pig.

收穫後 Post-Harvest of rice

水稻收穫後之處理，乾燥與精米之技術。
Post-harvest process:
Drying and Polishing know-how.

新鮮保存 Preserve freshness during Storage

稻米低溫貯藏技術，讓米保鮮長達36個月，
讓你找到最佳的賣點。
Using low temperature storage technology,
the freshness of rice can be preserved up
to 36 months until the best price in the
market.

廢物回收 Recycle waste

稻殼、稻桿、米糠再利用，飼料、草繩與有機肥。
Rice shell, rice stem, and rice bran can be recycled into:
animal feed, string, and organic fertilizers.
